 - ◊ I really wish that a course book was given with option assigned readings for each class period because it would've been nice to familiarize myself with material and then fully learn it in lecture. The course book that was given was confusing and hard to follow along and di not match the professors teaching. I also wish there was more extra practice other than the problem sets and practice exams. The problem sets were not at all like exam questions.

 - ◊ Parker Howell is my GOAT. Even though this discussion was not mandatory and at 8:30AM on Thursday, I still made it every time because he was so helpful. He was great with dealing with a range of students from incredibly confused to understanding the content. Any resemblance of me doing well in this class is because of Parker Howell and how he explained things in class. He was sensitive to student concerns yet he made sure to push us in answering questions, also

providing a great environment for students to ask questions. Give him a raise or a promotion or something for real because bro deserves it.

 - ◊ Parker was by far the best GSI I've had during my three years at Michigan. Not only was he able to explain the material in ways that were easy to follow despite me finding the course difficult, he also consistently took time outside of class to make sure all of my questions were sufficiently answered (whether that was via office hours or email). Parker's genuine enthusiasm for teaching and helping his students shown through, and I sincerely appreciate how approachable he was all

semester. Asking for help and showing that I was not always confident in the subject could have been tough, but I quickly learned that Parker was someone who genuinely cared about his students' success, and I am so glad that I was encouraged to always ask for help when needed.

 - ◊ Parker is an absolutely incredible GSI and one of the best instructors I've ever had. He took confusing, poorly explained lecture material and broke it down in discussion in a way that actually made sense. He has a real talent for explaining difficult concepts clearly and patiently, and he genuinely cares about his students' understanding. What really stood out to me was how he went above and beyond, he even reached out to me outside of class to offer extra explanations and

resources without me having to ask.
